Save a Life. Wear a Mask.

“Cloth face coverings are one of the most powerful weapons we have to slow and stop the spread of the virus.” - Dr. Robert R. Redfield, CDC Director

Six Reasons Why Marathon Health is the Safest Place to Receive Care.

Your health and safety matter to us. All of our health centers are following updated CDC guidelines and taking the precautions necessary to provide you with safe, high-quality care.

1. Marathon Health centers are reserved for our employer partners.
2. All patients must wear face masks upon entering the center.
3. No unnecessary visitors permitted to keep waiting rooms empty.
4. Appointments are staggered to reduce patient encounters.
5. Center staff are screened every morning for COVID-19 symptoms.
6. Rooms and surfaces are deeply sanitized with EPA-approved disinfectants, in addition to our normal cleaning protocols.

Growing evidence shows that wearing a mask limits the spread of COVID-19.

In fact, according to the CDC director, we could bring the pandemic under control in the next 4-8 weeks if everybody started wearing a mask today.

Three Ways to Limit the Spread of COVID-19:
• Wear a mask
• Wash your hands
• Watch your distance

We all have a role to play when it comes to protecting ourselves, our loved ones and our communities. 33,000 deaths related to COVID-19 could be avoided by October 1, 2020 if 95% of us wore a mask in public.

Schedule an Appointment Today.

Your Marathon Health provider is here to help you with all of your COVID-19 related questions and concerns. Schedule an appointment today by going online to: my.marathon-health.com

As a reminder, face masks are required when visiting a Marathon Health center.
